Ashley Park

The Walt Disney Company

500 S Buena Vista St

Burbank, CA 91521

Dear Ms. Park,

I am writing to express my interest in the Associate Software Engineer role at The Walt Disney Company. With a strong foundation in coding principles and a passion for technology and the arts, I am confident in my ability to contribute to Disney's mission of joy and magic.

At my previous 3 internships at Uber, I played a key role in updating internal tools at the company and involved myself in many skillsets including front-end and mobile development. My experience includes proficiency in React, JavaScript, as well as a solid understanding of design principles such as Figma and Adobe Creative Cloud.

I am particularly interested in Disney's commitment to storytelling and creativity, which I hope to follow with my degree in Computational Media. I want to be able to create immersive and interactive experiences through a large audience and I believe that Disney will allow me the opportunity to see out those goals.

In addition to my technical skills, I bring problem solving and communication skills to the table. Moreover, I have a creative background in design from Computational Media at Georgia Tech. I am confident my skills and mindset make me perfect for the position that you are offering.

Thank you for considering my application. I am eager to bring my skills and creativity to Disney and contribute to the continued success of your innovative projects. I look forward to the possibility of discussing how my experience aligns with your team's needs in more detail.

Sincerely,

Phoebe Wongphatarakul
